James Hardie is a world leader in the manufacture of high-performance fibre cement and fibre gypsum building solutions. As the trusted innovator and industry leader we empower homeowners and building professionals alike to achieve their dreams with premium quality solutions. Our products enable endless possibilities for designing forever homes and exceptional buildings, whilst also delivering trusted protection and long-lasting beauty.

We are a fast-paced company dedicated to our customers. We strive to deliver market driven innovation, an inclusive and empowering culture, and an unwavering commitment to our Zero Harm safety initiative. Whilst operating with a global mindset, we put great care into how our business can support the local communities in which we operate, live and work in.

Our cladding products not only create a stylish stand-alone solution, but also look great with other building materials such as stone, wood and brick, making design potential endless. We will provide sustainable solutions for your project, giving you affordable, individual designs, energy efficiency and everything you need to ensure your project looks stunning for years to come.

Build your projects with a global organisation that's been pursuing excellence since 1888.

Introducing the Hardie® Panel range

Purposely designed as external cladding for commercial buildings in both new build and renovation. Hardie® Panel and Hardie® Architectural Panel cladding can be used in a ventilated construction fixed to either timber frame, steel frame or masonry walls using corrosion resistant rivets. Our cladding can be installed with or without insulation. With Hardie™ Blade saw blade, Hardie® Panel sheets can be easily cut to size on site.

“ With James Hardie, all my open questions were clarified immediately and I always felt well looked after by trustworthy experts. It was a unique experience. ”

Robert L., Installer

The finishing touches to a reliable system

Hardie™ Panel MetalTrim™ profiles are the perfect finish for a modern facade with accessories that fit the panel colour perfectly, by creating a nice contrast with colour-headed fixings and profiles. Colour matched rivets can also be sourced for your project.

All our accessories were developed for easy installation and perfectly complement to our Hardie® Panel cladding, providing an overall system you can rely on.

Hardie™ Panel MetalTrim™
For exterior corners. Length: 3000mm

Available in the entire colour range from James Hardie

Hardie™ Panel Standing Seam End Trim
Façade design option. Length: 3000mm
Available in the entire colour range from James Hardie

Trust Hardie® Panel for your recladding project

In light of recent updates to legislation and safety requirements, there are many buildings in the UK that will need to replace existing non-compliant facades with a non-combustible alternative in both the residential and commercial sectors.

Hardie® Panel can be used as a direct replacement for existing cladding on a range of buildings. The non-combustible A2-s1-d0 rated panel can be trusted for protection against fire and extreme weathering for many years to come, whilst providing the strength, durability and style that your clients deserve.

Recladding your project with Hardie® Panel is a way to not only ensure project safety and compliance but is also great way to revitalise and modernise older buildings.

Updated UK building regulations 2010; approved document B

“ We chose Hardie® Panel for our project because we received a great amount of technical support from the team. The board is A2 fire-rated, affordable and in stock so for us, it was the obvious choice. ”

Andrew M., Architect
